

Inside Plant (ISP) Cabling

An Integrity Networks Systems Service Offering

About Integrity Networks

Integrity Networks, Inc. is a premier technology company offering a full range of Inside Plant (ISP) Cabling products and services. Our BICSI trained and certified designers, project managers and technicians have worked with a range of clients across corporate enterprise, education, healthcare, technology, data center, and military/defense sectors, providing an extremely diverse background. Our team is well-prepared to provide life cycle services support from concept and design, through delivery and installation, and ongoing maintenance.

ISP Cabling Solutions:

- Category 6, 6A, and future copper cabling standards as ratified
- OM1-OM4 multi-mode fiber optic cabling
- Single-mode fiber optic cabling
- High density cabling systems for Data Center and other space-limited applications
- Zone cabling systems to maximize flexibility and lowering life cycle costs
- Pathways, cabinets and all related infrastructure
- Grounding and bonding for a safe system that complies with BICSI, EIA/TIA and NFPA codes and standards
- Certification, labeling and documentation in accordance with the highest standards of the industry using the Fluke Versiv platform
- As-builts of the physical network developed in AutoCAD, Visio, or comparable formats

Expert Advice from Concept to Completion

At Integrity Networks, we are well-equipped to handle new construction projects such as a high-rise corporate office space in Seattle, a regional hospital in Nome, Alaska, retirement living communities in Florida, and a military headquarters building in Hawaii. We can help you get your cabling project from the design table to a fully-implemented and operational system.

We perform upgrades to existing cabling systems such as replacing fiber backbones in a distribution center in New York, updating communication closets for hospitals in California, and installing state of the art secure network media at military bases in Japan. We understand how to work within occupied spaces and meet the needs of various stakeholders from school children to call center employees, critical-care doctors to nurses, and even warfighters. Integrity will accomplish your cabling upgrade while minimizing operational impacts to your team.

As an added benefit, we offer a range of post-install support services. Our resources are dispatched nationally from our centrally-located service center in Tulsa, OK. No matter your time zone, we will help wherever and whenever you need us.

Integrity is there for you, throughout the United States and its territories.

Contact us today to speak with a sales representative to learn more about how our ISP cabling solutions can meet your business technology needs.
