

Deployment Services

An Integrity Networks Service Offering

INSTALLATION SERVICES THAT SUPPORT YOUR TECHNOLOGY UPGRADE OR ROLLOUT

Integrity's Deployment Services consists of onsite technical labor to handle the physical installation of technology equipment. Differentiated from field engineers by scope of service as well as cost, our Deployment Services technicians offer an alternative solution to solving skilled resource challenges.

WHEN DEPLOYMENT SERVICES MAKES SENSE:

Deployment Services makes sense when the equipment can be pre-configured, managed remotely, or when your own credentialed field engineer could really use some additional resources to shoulder the physical installation burden.

WHAT DEPLOYMENT SERVICES INCLUDES:

- ✓ Meeting your equipment shipments at site to receive, unbox, check for physical damage and ensure complete package contents
- ✓ Recording serial numbers, placing asset tags, completing inventory lists, etc.
- ✓ Physical installation of any technology device from switches to servers, phone sets to LCD screens: any product that is rack, cabinet, wall, floor, ceiling, table, or desktop mounted
- ✓ Physical connection of these devices to include patch cables, cords, power supplies, fiber optic cordage, HDMI cables, etc. to include grounding, dressing, labeling and documentation
- ✓ Log-in and confirm basic functionality in accordance with provided instruction
- ✓ Physical removal of legacy equipment and connections
- ✓ Documenting the installation to include sketches, CAD, photographs, spreadsheets, templates, etc.
- ✓ Upload or other transfer of installation documentation prior to departure from site when requested
- ✓ Disposal of waste and transport of obsolete, removed equipment from site
- ✓ Receipt of sign-off/acceptance from onsite end user POC

WHAT DEPLOYMENT SERVICES DOES NOT INCLUDE:

- ✗ Network or system design
- ✗ Field engineering
- ✗ Configuration
- ✗ Advanced troubleshooting
- ✗ User training
