

## Data Center

### What We Offer

Speed and accuracy are our top priorities when performing a data center build. Our designers, project managers and field staff understand the data center environment and we are able to provide services and solutions that are delivered timely and correctly. Emphasizing modularity and high density in our design approach and leveraging pre-fabrication where feasible, we have sufficiently assisted our clients control life cycle costs, reduce footprints, and speed deployments.

The types of clients that have entrusted Integrity Networks with key data center builds and upgrades include:

- ✓ State government agencies
- ✓ Technology companies
- ✓ Wireless providers
- ✓ Biotech firms
- ✓ Global web service providers

### From Concept Through Completion

Integrity Networks has highly experienced, professional and capable Project Managers that are ready to oversee rollouts of any complexity. Our Trusted Deliver Network (TDN) allows us to provide multi-site technology rollouts to our customers across 48 states, 2 US Territories, 9 countries and 4 continents.

As an added benefit, we offer a range of post-install support services. Our resources are dispatched nationally from our centrally-located service center in Tulsa, OK.

Whether your technology needs vary from a one-off occurrence to foreseeable ongoing needs, Integrity is there for you, throughout the United States and the Pacific Rim.
