DoD/Military

Providing Technology to Our Nation's Military

Integrity Networks. Inc is a premier technology company serving large enterprises in the commercial and government sectors. Based in Seattle. WA. Integrity also operates permanent offices in Alaska and Hawaii.

Our nation's military, through DARPA, laid the foundations for today's internet and our connected society. The US military continues to lead the world in its application of advanced technologies to the needs of defending our nation and securing our forces.

At Integrity Networks, we have performed base-wide technology upgrades in Hawaii and Alaska, performing survey, design and installation of physical network systems across hundreds of buildings. We've helped deploy networks within SCIFs across Asia and in the middle of the Indian Ocean. We've installed and commissioned advanced perimeter security systems to protect assets and forces related to air combat and undersea warfare. We've installed and configured video conferencing solutions to connect command and control across theaters. Integrity brings all of our capabilities and resources together to work through leading Defense IT and security integrators.
